- cB-OEMSPA332

Release History

Release	Date	Comment
BT IO 3.0 [14:21:50, Apr 02 2007]	2007-04-04	Official release of Bluetooth IO FW.
BT IO 3.7.0 Beta [11:29:57, Nov 03 2006]	2006-10-25	Beta 2 version of the Bluetooth IO FW. Bug fix regarding default values at connect.
BT IO 3.7.0 Beta [13:45:07, Oct 25 2006]	2006-10-25	Beta version of the Bluetooth IO FW. Note that the functionality may change in the official release.

Known Limitations and Notes

For some application scenarios there may be a problem with link/data loss for link policies that support sniff (link policies 4-8). The behavior is dependent on the traffic generated by the application, so it is recommended that thorough tests be performed on any application scenario where sniff mode is used.

Note that the number of connectors that are available as IOs differ between the different models. The table below lists the number of IOs that is available for the different models. Please read the Bluetooth IO Specification for details on the different models.

Model	IOs supported
cB-OEMSPA310	6
cB-OEMSPA311	12
cB-OEMSPA331	12
cB-OEMSPA312	10
cB-OEMSPA332	10

Anomaly Reports
